

House Cleaning Checklist

What a standard clean covers, room by room — and what it does not. Tick what you want.

Reading the right-hand column.

Some of these can be added to a deep-clean quote. Others, including carpet extraction, upholstery cleaning and specialty floor care, need a separate service. Repairs, remediation and unsafe work may be outside our scope. Tell us what matters when you ask for a quote and we will say what can be included.

Dishes.

Hand-washing dishes, unloading a full dishwasher and managing large quantities of dishes are not included in a standard clean. When an empty dishwasher is available, a reasonable number of dishes may be loaded so the sink can be cleaned. Otherwise, dishes may be moved carefully to a nearby safe area so the sink can be cleaned.

If something is missed.

Tell us within 24 hours by phone, text, email or the customer portal. We will review the concern and arrange a reasonable re-clean of missed, agreed-scope areas at no additional charge.
